

RIBBON LEFT AFTER WRAPPING

- 1 Saoirse has 50 cm of ribbon and uses 20 cm to wrap a present.
- 2 The word uses tells us to take away.
- 3 Work out $50 \text{ cm} - 20 \text{ cm}$.
- 4 The ribbon left is 30 cm.

WARM-UP

Draw bar models on the blanks to show each measures story.

1. Show 40 cm joined to 30 cm on the first bar model

--	--

2. Show 900 g with 400 g used on the second bar model

--	--

3. Show 1000 ml with 650 ml poured out on the third bar model

--	--

PRACTICE

- 1 A baker joins a 25 cm strip and a 35 cm strip of paper for labels. How long are they altogether? _____

? ALWAYS, SOMETIMES, NEVER

Always, sometimes or never true? Write A, S or N.

- | | |
|--|---|
| <p>a. The word altogether in a length story means you add the measures. <input type="text"/></p> <p>b. If a weight story says flour is used you take away from the total. <input type="text"/></p> | <p>c. You can mix cm and g in the same answer. <input type="text"/></p> <p>d. A capacity story with poured out means take away the amount. <input type="text"/></p> |
|--|---|

REFLECT

How did you decide whether to add or take away in each story problem?
