

COUNTING SEVEN DAYS AHEAD ON THE CALENDAR

- 1 Start at the given date on the classroom calendar.
- 2 Count forward exactly seven days in the weekday columns.
- 3 The date seven days later falls on the same weekday.

WARM-UP

Use the September calendar grid to find weekdays and count on in sevens.

September

Mon	Tue	Wed	Thu	Fri	Sat	Sun
						1
2	3	4	5	6	7	8
9	10	11	12	13	14	15
16	17	18	19	20	21	22
23	24	25	26	27	28	29
30						

1. Find the 10th and name its weekday
2. Start at the 3rd and count on 7 days to the new date
3. Mark the 7th and the date that is 7 days after it

PRACTICE

- 1 The classroom calendar shows the 3rd is a Monday. What day of the week is the 10th?
- 2 Start at the 3rd on the school calendar. Count on 7 days. Which date do you reach?
- 3 The 7th falls on a Saturday in the classroom calendar. What weekday is the 14th?
- 4 The teacher notes most months have 30 or 31 days. How many days does January have?

? ALWAYS, SOMETIMES, NEVER

Always, sometimes or never true? Write A, S or N.

- a. A week always has exactly seven days from Monday to Sunday. ☐
- b. The same weekday returns after seven days. ☐
- c. Every month has exactly thirty days. ☐
- d. The 10th falls on the same weekday as the 3rd. ☐

IRISH FACT

Ireland's national day

St Patrick's Day is on 17 March every year. It is always in the same month, so you can find it quickly on any calendar.

Irish calendar tradition
