

ROUND 740 TO THE NEAREST 100

- 1 740 sits between 700 and 800 on the line.
- 2 The tens digit is 4, which is less than 5.
- 3 So round down to 700.

WARM-UP

Mark each number on the number line, then circle the hundred it rounds to.

1. Mark 320 on the line. Mark the two nearest hundreds and circle the nearer one.
2. Mark 570 on the line. Mark the two nearest hundreds and circle the nearer one.
3. Mark 780 on the line. Mark the two nearest hundreds and circle the nearer one.

PRACTICE

- 1 A market stall counts 280 apples in a crate. Round the number of apples to the nearest 100.
- 2 A baker sells 460 bread rolls in one week. Round the number of rolls to the nearest 100.
- 3 A shop has 830 tins of soup on the shelves. Round the number of tins to the nearest 100.
- 4 A supermarket orders 2,650 bags of crisps for the week. Round the number of bags to the nearest 100.

SPOT THE MISTAKE

Tomás rounds 3,470 to the nearest 100 like this:

Look at the hundreds digit: 4.
4 is less than 5, so round down.
3,470 → 3,000.

Tomás looked at the wrong digit. What is 3,470 to the nearest 100?

REFLECT

When you round, do you picture a number line or check the digits? Which suits you better?
