

TWO-STEP: ADD THEN SUBTRACT

- 1 "Collects" €175 and €168 means join them first: $175 + 168 = 343$.
- 2 "Spends" €240 and "how much is left" means take away: $343 - 240$.
- 3 $343 - 240 = 103$.

WARM-UP

Draw a bar model for each problem, then label the operation you chose.

1. There are 153 fans in one stand and 128 fans in another stand. How many fans are there altogether? Draw a bar model and label the operation.

--	--

2. Meath scored 31 points and Louth scored 24 points. How many more points did Meath score? Draw a bar model and label the operation.

--	--

3. Look at the two-step example at the top. Draw a bar model for it and label the two operations.

--	--

PRACTICE

- 1 There are **146** fans in one stand and **139** fans in another stand. How many fans are there altogether?
- 2 Meath scored **43** points and Louth scored **26** points. How many more points did Meath score?
- 3 The hurling club has **248** members and **137** more join. How many members are there altogether?

REFLECT

Which clue words help you choose add, subtract, multiply or divide most reliably?
