

NAMING ONE FIFTH

- 1 The whole is cut into 5 equal parts.
- 2 1 of those parts is shaded.
- 3 The fraction is written $\frac{1}{5}$.

WARM-UP

Slice each circle into equal parts and shade to show the fraction.

1. Slice the first pizza into 4 equal parts and shade 1 part to show $\frac{1}{4}$.
2. Slice the second pizza into 3 equal parts and shade 2 parts to show $\frac{2}{3}$.
3. Slice the third pizza into 5 equal parts and shade 2 parts to show $\frac{2}{5}$.

PRACTICE

- 1 Mam bakes a round soda bread and cuts it into 6 equal pieces for the family. What fraction is one piece?

? ALWAYS, SOMETIMES, NEVER

Always true, sometimes true, or never true? Write A, S or N.

- | | |
|---|--|
| a. The bottom number of a fraction tells how many equal parts the whole is split into. <input type="text"/> | c. The top number tells how many parts we have. <input type="text"/> |
| b. Fraction pieces must be the same size. <input type="text"/> | d. Cutting a loaf into 4 unequal pieces still gives quarters. <input type="text"/> |

REFLECT

Why must the parts be equal before a fraction of a whole or a set makes sense?
