1. Shade every multiple of 6 up to 60: 6, 12, 18, 24, 30, 36, 42, 48, 54, 60.
2. Ring the numbers that are in both the 2 times table and the 3 times table up to 60.
3. Colour the multiples of 5 that are NOT multiples of 10: 5, 15, 25, 35, 45, 55.

PRACTICE

- 1 In a beanbag game the scoring rings count in fives: **5**, **10**, **15** ... Sam scores **20**. Is **20** a number you land on when counting in fives?
- 2 A hopscotch grid is numbered in fours. List the first six squares you land on when you hop in fours.
- 3 The board game path is marked every **6** steps. A counter jumps **6**, **12**, **18** ... Does it land on **30**?
- 4 At games club the blue counters land on multiples of **4** and the red counters on multiples of **6**. Which numbers up to **60** get both a blue and a red counter?
