

Plan and take an action

living-things

What you need: Investigation Journal page · clipboard for outdoor plan-checker copy of the board plan · pollinator-plan-friendly or Irish-native wildflower seed packet (or small plant plugs) · hand trowels · watering can with water · clean plastic bottles or a small wooden box frame for a bug hotel · bug hotel fillings (cardboard tubes, dry hollow stems, pine cones, dry leaves, corrugated card) · garden string or twine · wooden stakes or short garden canes · A4 card and permanent marker for a weatherproof class sign · round-tip scissors

Words to use

Biodiversity action · Evidence-based choice · Success sign

Our question

How should we design our chosen action so it answers what the audit showed and gives us clear success signs to check later?

I predict...because...

What we found out

Which audit finding does this plan answer?

What two checks will show whether the action helped, and which of those can Part 4 check honestly?
