

Big push, little push

energy-forces

What you need: soft ball or toy car · masking tape for floor lanes and start lines · beanbag or scrap of tape to mark stop points · chunky crayons

Our question

Which will go further: a little push or a big push?

Draw how far the ball or car travels after a little push and after a big push

Where did the little push stop?

Where did the big push stop?

Which push sent it further? Point to the mark.
