

Magnets: what do they pull?

energy-forces

What you need: strong chunky magnets · mixed objects tray (paperclip; steel bottle lid, washer or screw; wooden peg; lolly stick; steel spoon or key only if pre-tested) · shallow sorting or sharing tray

Our question

Which things did the magnet pull?

Draw which objects the magnet pulled and how the pull felt

Which things jumped to the magnet?

What did the pull feel like?

Which one will you draw?
