

What helps plants and animals flourish?

living-things

What you need: healthy potted plant · thirsty potted plant (left unwatered) · garden-animal picture cards (robin, hedgehog, frog, worm) · helper picture cards (water, sunshine, food, shelter, dry soil, dark cupboard, nowhere safe to rest, rubbish) · wall or noticeboard space for the flourish chart

Our question

What helps plants and animals outdoors grow strong and stay healthy, and who gives them what they need?

Does this help plants and animals outdoors grow strong and stay healthy, or does it not help?

helps them grow	does not help

What is different about the strong green plant and the floppy dry one?

What might this robin need outside so it can stay well?
