

Magnets: guess what they'll pull

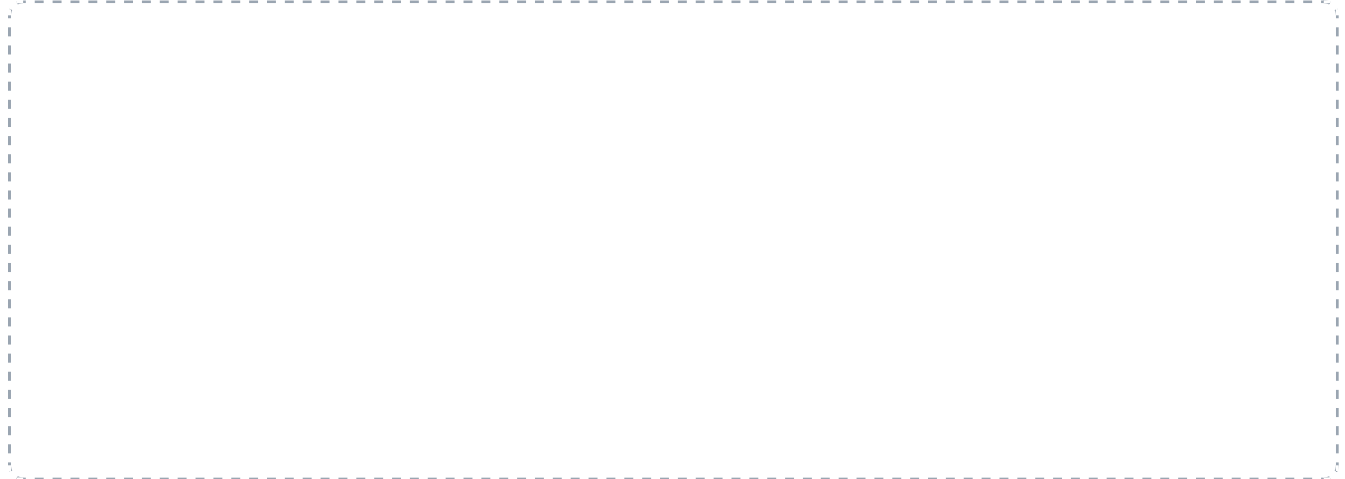

energy-forces

What you need: chunky bar or block magnets (large, child-safe) · mixed objects tray (large paperclip, metal spoon pre-tested, larger coin e.g. 50c or €1, large safe key if pre-checked, wooden peg, plastic brick, crayon, rubber, small fabric scrap, aluminium foil ball) · small trays or clear table spaces labelled yes and no (for sorting piles)

Our question

Which guesses matched, and which were a surprise?

Draw what the magnet pulled and what it did not pull

Draw one thing the magnet pulled

Draw one thing the magnet did not pull

Optional: circle or mark anything that surprised you
