

What energy can do

energy-forces

What you need: energy picture cards (fan, lamp, radiator, clapping hands, children playing, eating lunch) · classroom energy examples already in the room (lamp or IWB, clock, radiator; fan if available)

Words to use

Energy · Food energy

Our question

What in our classroom uses energy to move, light up, warm up or make a sound?

Draw one thing in the classroom (or our body) that uses energy, and what that energy does

What did you find that uses energy?

What is the energy making it do?

Can you show the energy job in your drawing?
