

Food chains and interdependence

living-things

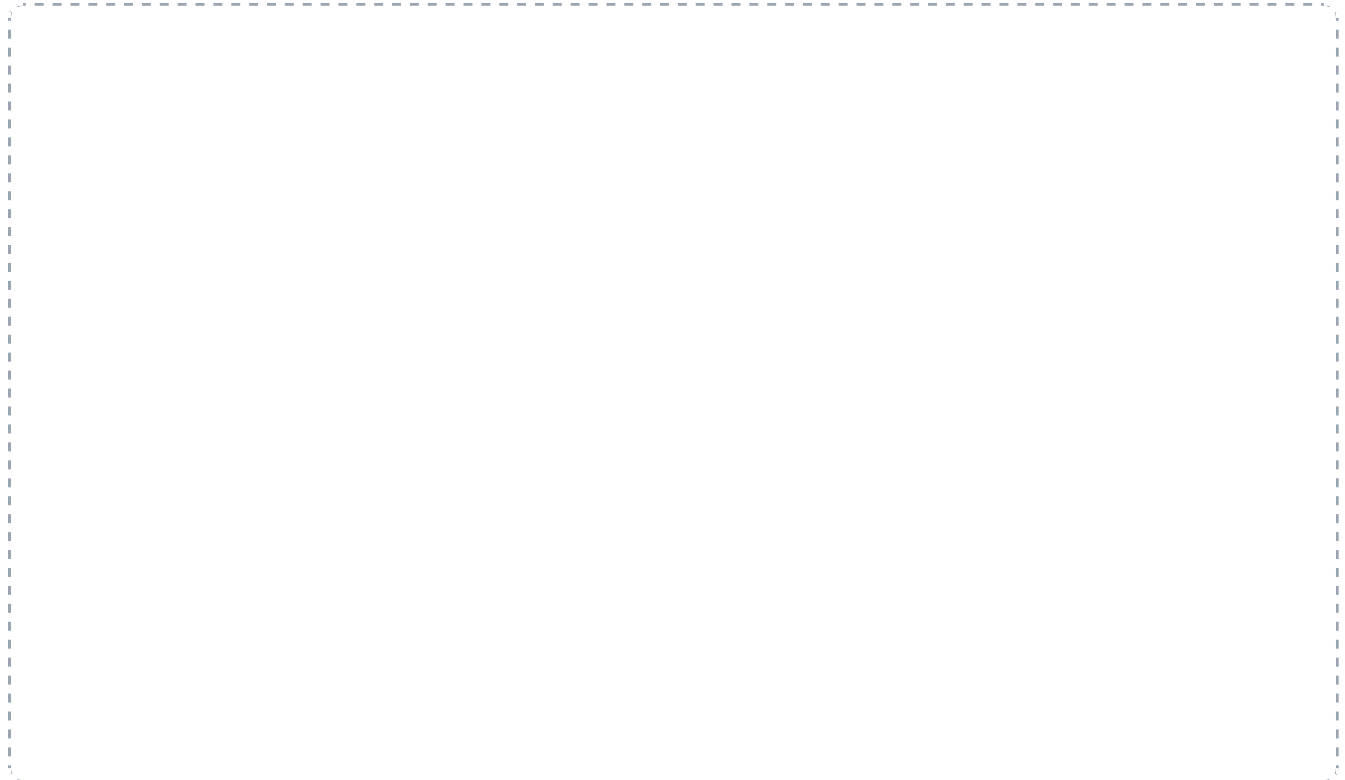

Words to use

Food chain · Producer · Food web · Interdependence

Our question

What food chains and simple food web can we build from the living things we surveyed in our school habitat?

Our food web: our survey chains, joined where they share a living thing. Arrows point to the eater. Write likely beside any eating we did not see.

Which living thing appears in more than one chain?

Where does the energy in your chains start?

The link we removed, and one knock-on effect
