

Food chains and interdependence

living-things

What you need: group survey notes from earlier in this project · species cards (grass, daisy, nettle, oak, dandelion, moss, aphid, caterpillar, snail, slug, earthworm, woodlouse, beetle, ladybird, spider, ant, bee, robin, blackbird, thrush, wren, plus blanks) · arrow cards labelled eaten by · string for a rare extra web join (teacher only, optional)

Words to use

Food chain · Food web · Interdependence

Our question

What food chains and simple food web can we build from the living things we surveyed in our school habitat?

I predict...because...

Draw and label the order

Labels to use

grass · caterpillar · spider · robin

The order I found

Which living thing appears in more than one chain?

Where does the energy in your chains start?
