

Reversible and irreversible changes

materials

Words to use

Reversible change · Irreversible change · Evidence

Our question

Which of these changes can we undo, and which make something new?

Which changes gave the same material back?

Which changes made something new?

What evidence did you use? (what you saw, heard or felt)

Words to sort

chocolate melt then cool · salt dissolve then dry · baking soda with vinegar · toasting bread

Our class sort

Reversible: the same material comes back	Irreversible: something new is made
