

Light: colour and the spectrum

energy-forces

Words to use

Light energy · Spectrum · White light

Our question

Does a dark surface warm up more than a pale surface under the same light?

I predict...because...

Draw or list the spectrum colours you saw

What did the spinning colour wheel look like when it went fast?

What we found out

Which card felt warmer, or did they feel about the same?

What does that suggest light can do, besides help us see?
