

# micro:bit responds to an input

technology

## Words to use

Input · Output · React · Sensor

## What made it react, and what it did

| The input (what we did to it) | The output (how it reacted) |
|-------------------------------|-----------------------------|
|                               |                             |
|                               |                             |
|                               |                             |
|                               |                             |

## One input we tried that did NOT work, and why we think that was

## A bug we fixed, and what caused it

## Where a device that reacts like this would be useful in real life
