

Engineer of the year: show what holds and why

engineering

Words to use

Evidence · Structural idea · Showcase

The user and the problem – who we designed for, and what they needed

What we made

One change we made, and why

Walking the other builds – what held on the build you liked most, and what number proved it?

Which idea would you steal for your next build, and why?

How did that group show their evidence?

One thing we would change next time
