

Measure, present and reflect

living-things

What you need: Investigation Journal pages from the biodiversity audit earlier in this project, plus clear space (or the provided results page) for today's after-counts, comparison and next step · hoop or string quadrat · magnifying glass · minibeast and plant ID sheet · clipboard · pencil

Words to use

Evidence of impact · Before-and-after comparison · Monitoring

Our question

Has our action changed what lives in this part of the grounds compared with our first audit?

Before and after our action – same place, same way of counting

What we counted	Before (audit)	After (today)

Which bars changed, and which stayed the same?

What does the evidence show about our action so far?

One next step we would take, and why
