Words to use

Evidence of impact · Before-and-after comparison · Monitoring

Our question

Has our action changed what lives in this part of the grounds compared with our first audit?

Before and after our action: same place, same way of counting

What we counted	Before (audit)	After (today)

Look at the class chart on the board: which bars changed, and which stayed the same?

What does the evidence show about our action so far?

One next step we would take, and why
