

Build the prototype

engineering

What you need: clean empty plastic bottle (500 ml to 1 l) · garden string or strong twine · lollipop sticks or thin garden sticks · sticky tape (roll) · scissors · bird seed (small cup for dry fit) · group Design Brief from earlier in this project

Words to use

Prototype · Design Brief · Design change

The question we were answering today

What part of the plan we built today

Our prototype so far

What we changed from the plan, and why

What we expected, and what the materials forced instead

One part that matched the plan

The next thing we must fix
