

# STEM all around us: the story of figuring things out

living-things

**What you need:** clipboard with blank list sheet (or lined paper) · STEM eyes prompt cards (Look up high; Look down low; Tools and measures; Built to last; Science eyes) · sorting category cards (Science; Technology; Engineering) · sticky notes for I wonder questions · pencils

**Words to use**

STEM · Science · Technology · Engineering

**Our question**

What might people have used before one of your STEM finds existed, and how did that change the job?

**Words to sort**

classroom thermometer · weather chart · pencil sharpener · door ramp · gate hinge

Sort each find into science, technology or engineering using the best fit and a spoken reason

| science | technology | engineering |
|---------|------------|-------------|
|         |            |             |
|         |            |             |
|         |            |             |
|         |            |             |
|         |            |             |

**What I found out**
