

Where energy comes from: renewable or not?

energy-forces

What you need: energy-source cards (wind, sun, turf, gas, moving water, wood) · sorting trays or mats labelled renewable and non-renewable · simple blank outline map of Ireland on the IWB · small sticky notes or tokens for placing sources on the class map · square paper for pinwheels (about 15 cm by 15 cm), slits pre-cut toward the centre · pencil with rubber · pin or push pin · scissors (round tip)

Words to use

Renewable · Non-renewable · Wind energy

Words to sort

wind · sun · turf · gas · moving water · wood

Sort each energy source into renewable (keeps coming back) or non-renewable (will run out).

renewable	non-renewable

What I found out
