

Our senses help us investigate

living-things

What you need: opaque feely bags or clean socks with sealed objects (smooth stone, pine cone or rough sponge, soft fabric, wooden block) · opaque sound jars or yoghurt pots with lids (dry rice, paper clips, cotton wool, buttons or coins) · smell pots with cotton wool (orange peel, mint leaves or mint tea bag, coffee grounds or cocoa, plain soap scrap) · magnifiers · science word cards (smooth, rough, soft, hard, cool, warm, round, loud, quiet, rattly, muffled, strong smell, gentle smell) · station instruction cards (Touch, Sound, Smell) · leaf or fabric scrap for whole-class sight look

What to do

At every station, write or draw one careful observation before you move on.

My station observations

Sense I used (eyes, ears, nose, hands)	My careful observation in science words
Touch station	
Sound station	
Smell station	

Draw one thing you noticed
