Our question

Which of our materials bends the most, and how do they compare for see-through and strength when pulled?

I predict...because...

How far did each material bend? (in cm)

Material	How far it bent (cm)

Draw a bar chart of our results

Which material bent the most?

Which was most see-through?

How did the natural materials compare with the ones made by people?

Our bend ranks, most bendy to least bendy
