

Mixing materials: what happens?

materials

What you need: clear plastic cups · hand-cool water in a jug · sugar · salt · clean play sand · plain flour · plastic spoons · cloths or paper towels for spills

Words to use

Mixture · Dissolve · Predict

Our question

What happens when we stir sugar, salt, sand and flour into water?

I predict...because...

Which materials seemed to disappear?

Material	Seemed to disappear? (yes or no)

Draw a none chart of our results

Draw and label what you see

Lesson 13

Which materials seemed to disappear?

Which materials could you still see?

What about flour when the water went cloudy?
