

TOTALLING TWO SHOP PRICES

- 1 Build the first price as 60c on the coin mat.
- 2 Join the second price of 40c beside it.
- 3 Count all the cents: $60 + 40 = 100$ c.
- 4 Swap 100c for €1 and read the total as €1.

WARM-UP

Use the coin mat to build each pair of prices and show their total.

1. Build 10c and 80c on the mat then total them

€2	€1	50c	20c	10c	5c	2c	1c

2. Make 60c + 70c with coins and write the total

€2	€1	50c	20c	10c	5c	2c	1c

3. Place €1.10 and 80c on the mat and find what they come to

€2	€1	50c	20c	10c	5c	2c	1c

PRACTICE

- 1 An apple costs 25c and a banana costs 25c. How much _____ is the total for both?

? ALWAYS, SOMETIMES, NEVER

Always, sometimes or never true? Write A, S or N.
