

WRITE 'FOUR THOUSAND AND SEVENTY' AS DIGITS

- 1 The thousands chunk is four thousand, so write **4** in the Th column.
- 2 There is no hundreds word, so write **0** in the H column.
- 3 Seventy means **7** tens and no units, so write **7** in T and **0** in U.

Th	H	T	U
4	0	7	0

 WARM-UP

Write one digit per cell on the place-value mat, then read each number aloud.

Th	H	T	U

1. Write 5,842 across the Th, H, T and U columns.
2. Write 'six thousand and forty' as digits in the columns.
3. Write 'two thousand, three hundred' as digits in the columns.

 PRACTICE

- 1 The school library shelf card shows **4,326** books. Write that number in words on the card.
- 2 The pupil raffle tickets are numbered up to **7,105**. Write **7,105** in words for the poster.
- 3 The head teacher reads out that the school has one thousand, two hundred and five pencils. Write that as digits.
- 4 The classroom points chart total is read aloud as three thousand and ninety. Write it as digits.
- 5 The sports hall seat labels reach **7,016**. Write **7,016** in words for the seating list.
- 6 The whole-school fundraiser counter shows nine thousand, four hundred stickers collected. Write that as digits.

! SPOT THE MISTAKE

Aoife reads 5,008 like this:

5,008 = five thousand and eighty

Aoife is wrong. How should 5,008 be read?
