

BOTTLE OF FIZZY WATER

- 1 A 1.5 l bottle must be written in ml to match a glass.
- 2 Multiply litres by 1,000: $1.5 \times 1,000$.
- 3 The digits slide three places: 1.5 becomes **1,500**.
- 4 So the bottle holds 1,500 ml.

WARM-UP

Write each capacity on the place-value mat, one digit per cell.

Th	H	T	U	t	h

1. Write 2 l as 2,000 ml on the first row of the mat
2. Write 0.75 l as 750 ml on the second row of the mat
3. Write 1,250 ml as 1.25 l on the third row of the mat

PRACTICE

- 1 A shop sells a **4 l** carton of milk. How many millilitres is that? _____
- 2 Mum buys a **3 l** bottle of cooking oil. Write its capacity in ml. _____
- 3 A juice carton holds **800 ml**. How many litres is that? _____
- 4 A recipe needs **0.35 l** of stock. Convert that amount to millilitres. _____
- 5 A large yoghurt pot holds **1,750 ml**. Write this capacity in litres. _____
- 6 A small cream pot is labelled **0.125 l**. How many millilitres does it hold? _____

? ALWAYS, SOMETIMES, NEVER

Always, sometimes or never true? Write A, S or N.

- a. 1 l is the same as 1,000 ml
- b. To change litres to millilitres you multiply by 1,000
- c. 750 ml equals 0.75 l
- d. 0.4 l is the same as 40 ml

IRISH FACT Ireland drinks a lot of milk

Irish people drink about **105 litres of fresh milk** each per year — roughly **290 ml every day**, the **highest** in the EU. A standard school milk carton holds **200 ml**.
