

TREASURE AT THE END OF A ROW

- 1 The treasure is hidden at the very end of the twenties row.
- 2 The twenties row holds **21** to **30**.
- 3 The last square of that row is **30**.
- 4 Dig for the treasure on **30**.

WARM-UP

Shade and mark the numbers on the hundred square below.

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

1. Shade the path 16, 42, 75 and 98.
2. Mark 24, 37 and 60 and circle the end of the twenties row.
3. Colour every square in the forties row from 41 to 50.

PRACTICE

- 1 In a pirate treasure game the prize is buried on the hundred square at the very end of the seventies row. Where should you dig? _____
- 2 Your counter lands on **24** in a board game. Say the row out loud then how far along before you shade the square. 
- 3 A race game ends when a player reaches **60**. Say which row it belongs to and whether it is at the start, middle or end of that row. 

? ALWAYS, SOMETIMES, NEVER

Always, sometimes or never true? Write A, S or N.

- a. 30 is the last square of the twenties row.
- b. The tens digit tells you which row a number lives in.
- c. The ones digit tells you which row a number lives in.
- d. 37 is three squares along in the thirties row.
