

- 1 The tall skinny bottle starts **full** of juice.
- 2 Pour every drop into the short fat jar.
- 3 The short jar is now full and some juice is left over, so the short jar **holds more**.

1 On the teacher's desk sits a school water bottle with no water left inside.

**2** In the art corner a small cup and a big jug both wait to hold paint water.

3 The class glue pot is filled right up to the brim ready for craft time.

4 At the sink the teacher lines up a cup, a jug and a bucket for cleaning brushes.

5 Mia fills a vase with water and pours it all into a mug. The mug overflows and water spills. Which holds more, the vase or the mug?

6 A full jug of water is poured into a bowl until the jug is empty. The bowl is only half full. Which holds more, the jug or the bowl?

**Always, sometimes or never true? Write A, S or N.**

- a. A full jug holds more than an empty jug of the same size. ☐
- b. A tall skinny bottle holds more than a short fat jar. ☐
- c. A half-full cup is the same as a full cup. ☐
- d. A bucket holds more than a cup. ☐
