

LINING UP THE DAY CARDS

- 1 Line up the five school days first: **Monday, Tuesday, Wednesday, Thursday, Friday.**
- 2 Add the two weekend days after the school days: **Saturday** then **Sunday.**
- 3 After Sunday the week goes round again to **Monday.**

PRACTICE

- 1 In the classroom the day cards are mixed up. The teacher holds up Tuesday and asks which day comes next.

What day comes after Tuesday?

- 2 The class writes the days that are not school days on the board.

Name the two weekend days.

- 3 On the classroom board the Wednesday card is fixed. Which day card sits just before it?

- 4 School is nearly finished for the week. Today is Friday. What day comes tomorrow?

- 5 All the day cards fell on the classroom floor. Put every card back in the right order from Monday.

- 6 After the weekend the class starts again.
Which day always follows Sunday?

ALWAYS, SOMETIMES, NEVER

Always, sometimes or never true? Write A, S or N.

- a. Monday comes before Tuesday. ☐
- b. Saturday is a school day. ☐
- c. The day after Friday is Saturday. ☐
- d. The weekend has three days. ☐
