

ADDING THE COINS IN ONE PURSE

- 1 Find the coin worth the most: the **20c** coin.
- 2 Start the count at **20**.
- 3 Jump on the 10c to reach **30**.
- 4 Jump on the 5c to reach **35c**.

WARM-UP

Use the coin mat to make each total. Start with the biggest coin each time.

€1	50c	20c	10c	5c	2c	1c

1. Make 25c with a 20c coin and a 5c coin and write the total.
2. Make 32c with a 20c, a 10c and a 2c coin and show the jumps.
3. Make 45c starting with 20c coins and count on the rest.

PRACTICE

- 1 At the fruit stall Maeve pays with two **20c** coins. What total does she hand over? _____
- 2 Tom buys a warm bun and gives one **20c** coin and two **2c** coins. How much does he pay in all? _____
- 3 Sara buys milk and uses two **20c** coins and a **2c** coin. Find the total she spends. _____

? ALWAYS, SOMETIMES, NEVER

Always, sometimes or never true? Write A, S or N.

- a. Starting with a 20c coin then adding 10c and 5c reaches 35c. ☐
- b. The biggest coin means the one that looks the largest on the table. ☐
- c. A 20c coin and a 10c coin total 30c. ☐
- d. You begin the count from the smallest coin in the purse. ☐
