

Design Brief

Choose the job, then test a small version first

engineering

Words to use

User need · Must-do list · Half-size test

Our job: who it is for, and the load it must hold

What failed on the small piece (shape, join or tip)

Two must-dos for the full build, from that failure

Our sketch: mark the shape that carries the load and the join that strained**We will know it works when...(a number or a clear yes or no)**
