Lesson 5

The eye and reacting to a stimulus

Living Things

Words to use

Pupil

Our question

> How does the eye react on its own: to light, and to something sudden?

Test 1: the pupil in bright light, then the moment the eyes open

When	How big the pupil looked
In the bright light	
The moment the eyes opened (after 30 seconds covered)	

Did the change happen quickly or slowly?

Test 2: one gentle clap beside the clear sheet

> Never clap toward the face. Watch your partner's eyes, then swap roles.

I predict...because...

Blink or no blink?

Who	Blink or no blink
My partner	
Me	

What we found out

> Finish each sentence.

In bright light the pupil looked...

The moment the eyes opened, the pupil looked...

When we clapped, my partner...
