Lesson 10

Comparing properties

Materials

Words to use

Property · Compare · Soaks up

Our question

> **How far does water travel along each of our materials, and how do they compare for see-through and strength when pulled?**

I predicted the water would travel furthest along the…

What we found

Material	How far the water went (cm)	See-through? Clear, a bit or not	Pull: tear, stretch or hold?
Card (natural)			
Cotton (natural)			
Plastic (made by people)			
Foil (made by people)			

Our water race order: write the furthest first

1st	2nd	3rd	4th

How did the natural materials compare with the ones made by people?

If you have time: draw the strip the water went furthest along. Colour in the wet part.
