MODULE 9 · MATHEMATICAL MODELING AND END-OF-YEAR REVIEW

REVIEW

HOW TO ANSWER TODAY

- **Area.** Area = length $\times$ width. Write the answer in square units (cm^2 , m^2).
 $5 \text{ m} \times 3 \text{ m} \rightarrow 15 \text{ m}^2$
- **Quadrants.** Q1 is top-right; numbering goes ANTICLOCKWISE. A point on an axis is on the axis, not in a quadrant.
 $(3, 5) \rightarrow \text{Q1} \cdot (-2, 1) \rightarrow \text{Q2} \cdot (0, 4) \rightarrow \text{on the y-axis}$
