

Triangles of every kind

MODULE 6 · SHAPE AND SPACE — 2D, 3D, POSITION AND TURNS

SHAPE & SPACE

★ STRETCH PROBLEMS

- 1 A shape has 3 straight sides and points down. Is it a triangle? _____
- 2 A shape has 3 sides, but one side is bendy. Is it a triangle? _____
- 3 A shape has 4 straight sides. Is it a triangle? Say why. 
- 4 Draw a tall thin triangle and a short wide triangle. How many straight sides does each one have? _____

● INVESTIGATE

Every kind of triangle

Draw three different triangles, a tall one, a wide one and one pointing down. Check that each one has exactly 3 straight sides.
