

Our school habitat and its food chain

3rd Class

Print and cut along the dashed lines. These carry the **text a group reads** — a job to do, a brief to research, or notes to identify by. Check the lesson's teacher notes for how many sets each group needs and how they are used: some lessons hand out one card per group, others sort or sequence a full set.

Dead leaves

Fallen plant material on the ground. Once part of a living plant

Woodlouse

A small minibeast found in damp leaf litter

Blackbird

A garden bird that hunts for small animals on the ground
