

Creating a Scratch Account

Dear Parent/Guardian,

As part of our coding lessons in school we will be creating Scratch website accounts for each child. Scratch is a programming language and online community where children can create their own interactive stories, games, and animations and children need an account to be able to save their work.

To create an account for your child they will need to enter your email address so that their account can be confirmed. Please write down your email address below and have your child bring this sheet back in with them as they will need it to create their account.

Parent/Guardian Email Address: _____

The Scratch website is available at <https://scratch.mit.edu>.
